

Abigail E. Parisot

East Lansing, MI | parisot1@msu.edu | (248) 872-9754 | aeparisot.github.io

SKILLS

Machine Learning: Scikit-Learn, SciPy, TensorFlow (Keras), PyTorch

Object Oriented Programming: Python (Pandas, NumPy), C++

Shell scripting: Bash, Zsh, System administration, Git

Database Management: MySQL, SQLite, MongoDB (Mongo Client), Microsoft SQL

Visualization: Matplotlib, Seaborn, MATLAB, Microsoft Office Suite (Word, PowerPoint, Excel), LaTeX, R

EXPERIENCE

Wang Lab of Computational Biology- East Lansing, MI

Student Information Technical Assistant

December 2025 - Present

- Visualized and analyzed genomic data using ParaView and Python to identify structural patterns and biological insights
- Applied mathematical modeling and quantitative analysis to genomic structures, translating biological data into conclusions on individuals predicted health
- Collaborated in a computational biology research environment, leveraging bioinformatics pipelines to process and interpret large-scale genomic datasets

Computational Math, Science & Engineering Dept.- East Lansing, MI

Undergraduate Learning Assistant

January 2024 - Present

- Educated 60+ students per class in Python and matrix algebra through active teaching, facilitated conceptual thinking about computer science
- Educated students in Git and PowerShell through in class examples and activities
- Hosted two weekly office hours to reinforce instruction through one-on-one lessons and graded up to 50 assignments weekly

Student Life and Engagement- East Lansing, MI

Student Bookkeeper

May 2024 - September 2024

- Handled over \$15,000+ in cash daily by counting, sorting and preparing banks for university events
- Organized and processed accounting invoices for 8 separate budgeting teams using Microsoft Excel and office scripts

EDUCATION

Michigan State University, College of Engineering- East Lansing, MI

3.265

Bachelor of Science, Computational Data Science

August 2022 - Present

Studied foundations of data science including a wide range of fundamental computer science courses from web development to theory of computation and fundamental algorithms

COURSES AND SPECIALIZATIONS

Fundamentals of Data Science: Data Science methods such as unsupervised learning and supervised learning, feature extraction, dimension reduction, clustering, regression and classification

Numerical Analysis: Numerical integration, differentiation, and solution of differential equations using algorithms integrated in Wolfram Mathematica

Introduction to Artificial Intelligence: Fundamental algorithms for intelligent systems
